

Discussion groups

Group	Stakeholder
1	International Organizations and NGOs
2	Community Health Workers and Educators
3	Local Public Health & Veterinary Services
4	Government Agencies and Policy Makers

Topic: Translating results to stakeholders

- Same grouped assigned for lab practicals (4 groups)
- Each group will consider a different stakeholder

A decorative graphic on the left side of the slide shows a dark branch with several colorful sticky notes (yellow, orange, green, blue, purple) attached to it. The notes are slightly out of focus, creating a sense of depth. The background of the slide is white.

Summarise discussions

- Each group should record important points from discussion
 - Assign a person to take notes
- Present a few slides to summarise

Understanding and Interpretation:

- How can we ensure that your stakeholder understands the implications of rabies genomic surveillance results?
- What strategies could you take to interpret complex genomic data and translate it into actionable insights within your stakeholder community?

Communication Strategies:

- How can you effectively communicate rabies genomic surveillance findings to your stakeholder?
- How can you ensure that the information is conveyed clearly, accurately, and in a manner suited to your stakeholders' backgrounds and expertise levels?

Integration into Practices or Policies:

- How can your stakeholder group integrate rabies genomic surveillance results into existing practices or policies?
- What adjustments might need to be made within your stakeholder community to accommodate the insights derived from genomic surveillance data?

Engagement and Action:

- What steps can your group take to engage stakeholders based on rabies genomic surveillance findings?
- How can your group encourage proactive measures or decisions based on the insights obtained from genomic surveillance, ensuring that they translate into tangible actions or policy changes?
